Summary

• Efficient frontend developer and Javascript engineer with over one year of frontend experience.
• I am a firm believer in the mobile-first approach, trained in React js, Vue js, Technical writing, Vanilla Javascript, CSS3 and HTML5.
• I built responsive websites and web applications with complete web functionality that makes them stand out from the ordinary. I love unique challenges that require me to work outside my comfort zone and knowledge set, as I continue learning new languages. I am highly organized and have an extensive learning capability, good problem solving skill and great work consistency. I am an active team player and a patient listener. Development techniques are important to me as well as the success of any organization.

Experience

Frontend Developer
GitHub

Jul 2022 - Present (7 months)

• I make github contributions.
• this is one of the ways I develop my problem solving skill and it has been great so far.
